

## CUMMINS URGES PASSAGE OF BILL

Says Congress Must Choose  
Between Profiteering or  
Winslow Measure.

WASHINGTON, Aug. 29.—(By I. N. S.)—Congress must choose between allowing the public to be plundered by coal profiteers, or passing the administration bill to give the interstate commerce commission blanket power to distribute coal and prevent the "exaction of unreasonably high prices," Sen. Cummins, chairman of the senate interstate commerce committee, warned this afternoon in reporting the measure to the senate.

The Winslow bill to enlarge the powers of the interstate commerce commission for the equitable distribution of coal was formally reported to the house this afternoon and taken up under a rule limiting debate to six hours. The bill has a price-fixing provision, prohibiting the shipment of interstate commerce of coal which is sold at an exorbitant price.

"The present situation is an exceedingly grave one," said Cummins. "At this time there is a sharp coal shortage of which some operators and many dealers are taking advantage."

"The fact is, that some of the railroads which carry a large part of the coal traffic are by reason of the railroad strike unable to move the coal that is actually being produced and unless the railroads can speedily increase their facilities the coal shortage in many parts of the country is bound to continue and we will be in exactly the same position as though the coal were not being produced."

"It is to be regretted that it has become necessary to enlarge the authority of the commission in this regard but it seems to the commission that the congress must choose between a measure of this character and allowing the consumers of coal to be plundered by the avarice of those who are willing to seize the opportunity to sell coal at a price that cannot be justified," Cummins continued.

## BLAME CITY FOLK FOR FARMERS' LOSS

Brown Declares Residents of  
Towns Refuse to Pay  
Farmer's Price.

INDIANAPOLIS, Aug. 29.—Indiana farmers will lose money this year, John G. Brown, president of the Indiana Federation of Farmers' associations said today.

Possibly the stock raisers will make money but the farmers that raise grain will conceive a very small profit, he said.

The city people are to blame for this condition in many respects. "People that live in the large communities consume more than they legitimately earn," Brown said. "They do not produce enough to compensate for their demands. They

demand luxuries and living conditions that the farmer cannot afford. They demand short days while the farmer works sun-up to sun-down. "The city people are not willing to pay the farmer's price for his goods and charge too much for the farmer's necessities."

"Labor is scarce on the farm, because of the advantages of the city, and this raises the farmer's help expenditures."

"The farmer also must compete with the other industries that have guaranteed incomes—industries such as utilities."

"The soil is not as fertile now as it was 50 years ago when labor was cheap and the city people did not demand so much. This increases the farmers overhead."

"Then how does the farmer live? He mortgages his property—a majority of the Indiana farms are mortgaged," Brown said.

But here is a ray of hope.

"The farmers are beginning to learn the advantages of cooperation. They are getting together to eliminate the expenses of selling their products."

## Hay Fever Relief

May be Had Right at Home

WHILE there is no certain "cure" for hay fever, Vicks in many cases will give relief. As a preventive, keep Vicks up the nostrils, especially when exposed to dust.

To clear the head, melt Vicks in a spoon or tea kettle and inhale the vapors.

For relief during a night attack, rub Vicks over the spinal column from the neck to the hips. Then apply over throat and chest and cover with hot flannel cloths.

Leave the bed covering arranged in the form of a funnel so that the vapors arising may be freely inhaled.
